*Welcome to*

# The Wayfinder Cellar

*A collector's record of bottles worth bringing home.*

> You've been invited to join The Wayfinder Cellar — a private app for tracking your spirits and wine collection.
>
> This guide walks you through signing up and installing the app on your phone. It takes about 5 minutes.

**What you'll need**

✓ The invite code from the person who invited you
✓ Your email address
✓ Your phone (iPhone or Android)
✓ About 5 minutes

**The app URL**

**`thewayfindercellar.co.uk`**

Any questions? Email us:
`hello@thewayfindercellar.co.uk`

## Part 1 — Sign up

These steps are the same whether you have an iPhone or Android.

### 1 Open the app in your browser

> ⚠ iPhone users — you must use Safari for this step, not Chrome or any other browser. Safari is the compass icon on your home screen.
> Android users — Chrome works perfectly.

1. Open Safari (iPhone) or Chrome (Android)
2. Type this address in the address bar and go to it:

   **`thewayfindercellar.co.uk`**

3. You will see the login screen — The Wayfinder Cellar logo and a sign in form

## 2 Enter your invite code

4. Tap Sign up at the bottom of the screen (below the Sign in button)
5. A step indicator appears at the top of the screen — you'll see it track your progress through Invite → Details → Check email
6. Enter the invite code — the code the person who invited you gave you. It is case-sensitive.
7. Tap Continue

## 3 Enter your details

8. Fill in your first name and last name
9. Enter your email address
10. Choose a password. It must be at least 12 characters and include all four of: an uppercase letter, a lowercase letter, a number, and a symbol (like ! or @). A checklist shows whether each requirement is met as you type.
11. You'll see a note confirming that creating an account means you agree to the Terms of Service and Privacy Policy
12. Tap Create account

> Password tip: a passphrase works well here.
> Something like: Whisky&Glenfarclas2026! is long, memorable, and meets all requirements.
> Changed your mind about the invite code? Tap Back to return to the Invite step.

## 4 Check your email

13. After tapping Create account you will be taken to a “Check your email” screen — the last of the three signup steps
14. Open your email inbox and look for an email from noreply@thewayfindercellar.co.uk
15. The subject line is: The Wayfinder Cellar — Confirm your account
16. Open the email and tap the gold Confirm email address button
17. You will be taken back to the app automatically

If the email doesn't arrive within a few minutes, check your spam or junk folder. The email comes from noreply@thewayfindercellar.co.uk — mark it as safe if your email client asks.

## 5 Complete your profile

18. After confirming your email you will land on the onboarding screen — your name is already carried over from sign up, so there's nothing to re-enter here
19. Choose your preferred currency for valuations (e.g. GBP £)
20. Choose whether you'd like occasional app update emails — tap Yes, keep me posted or No thanks (you can change this anytime from Profile)
21. Tap Continue to my cellar
22. You will land on your Collection page — you will see a sample bottle (a Highland Park 12 Year Old) to show you what the app looks like. It disappears automatically the moment you add your first real bottle.

You're in! Your account is set up and your collection is ready.

# Part 2a — Install on iPhone

Installing the app to your home screen means it opens full screen like a native app — no browser bar, no address bar. Always launch it from the home screen icon for the best experience and for the camera to work on the Scan tab.

⚠ This only works in Safari. If you are in Chrome or another browser, the Add to Home Screen option will not appear. Switch to Safari first (the compass icon).

## 6 Add to your iPhone home screen

23. Make sure you are on the app in Safari and you are signed in
24. At the bottom of the Safari screen, tap the Share button — it looks like a square with an arrow pointing upward. It sits in the middle of the bottom toolbar.
25. A menu slides up from the bottom. Scroll down through the options.

26. Tap Add to Home Screen
27. The name shows as The Wayfinder Cellar — leave it as is and tap Add in the top right corner
28. Press the Home button. The app icon is now on your home screen.
29. Tap the icon to launch the app full screen

> The app is now installed on your iPhone.
> Always open it from the home screen icon — not from Safari.

### 7 Allow camera access (first time only)

30. Open the app from your home screen icon
31. Tap the Scan & lookup tab at the bottom of the screen
32. Tap Start camera scan
33. iPhone will ask: "The Wayfinder Cellar would like to access the Camera" — tap Allow
34. The camera is now ready for barcode scanning. This permission is remembered — you will not be asked again.

> If you accidentally tapped Don't Allow, you can fix this:
> Go to iPhone Settings → scroll down to Safari → Privacy & Security
> → Camera → set to Allow.
> Or: Settings → scroll to find The Wayfinder Cellar → Camera → Allow.

## Part 2b — Install on Android

The process on Android is similar but uses Chrome rather than Safari. The app installs to your home screen and app drawer.

### 6 Add to your Android home screen

35. Make sure you are on the app in Chrome and you are signed in
36. Chrome may automatically show an "Add to Home screen" or "Install app" banner at the bottom of the screen — if you see it, tap Install and skip to step 5
37. If no banner appears, tap the three-dot menu in the top right corner of Chrome
38. Tap Add to Home screen or Install app

39. Tap Add or Install on the confirmation that appears
40. The app icon appears on your home screen and in your app drawer
41. Tap the icon to launch the app full screen

> The app is now installed on your Android phone.
> You can launch it from your home screen or app drawer.

### 7 Allow camera access (first time only)

42. Open the app from your home screen icon
43. Tap the Scan & lookup tab at the bottom of the screen
44. Tap Start camera scan
45. Android will ask for camera permission — tap Allow
46. The camera is ready for barcode scanning. This permission is remembered.

## Part 3 — Using the app

| Tab | What it does |
|---|---|
| **Collection** | Your bottles. Tap any bottle to see full details, get an AI valuation, or fill in missing information automatically. |
| **Explore** | Discover bottles tied to a country or region — ranked picks, plus your wish-list items for that place. |
| **Wish list** | Bottles you want to find. When you acquire one, tap Got it and it moves to your collection. |
| **Scan & lookup** | Point your camera at a barcode or enter a barcode number manually. The app identifies the bottle and pre-fills all the details. |
| **Add bottle** | Add a new bottle to your collection — enter the name, type, and any details you know. AI fills in the rest. |
| **Import** | Bring in bottles from a CSV file (e.g. exported from Vivino or Whiskybase). Map your columns, review matches, and add many bottles at once. |
| **Export** | Mobile only. Tap the chevron at the end of the bottom tab bar to open a small sheet, then export your collection as CSV. |

Your collection is private — we don't browse your bottles. A small amount of aggregate usage information is visible to app admins for support and troubleshooting purposes only.

> Help and frequently asked questions are available from the account menu at the top right of the screen. You'll also find links to the Privacy Policy and Terms of Service there.

## Need help?
